

5. (currently amended) The modular air system of claim 4, characterized in that the base unit (4) receives an unloading valve, an outlet control valve and/or optional safety valves.

6. (currently amended) The modular air system of claim 4 or 5, characterized in that the base unit (4) optionally receives a heater, a silencer, a turbo protection valve and/or a depot valve.

7. (currently amended) The modular air system of ~~any of the claims 2 to~~ claim 6, characterized in that the air treatment module (2) comprises a cartridge for heavy duty, a cartridge for light duty and/or a unit for coarse separation of contaminants from the compressed air.

8. (currently amended) The modular air system of ~~any of the claims 3 to~~ claim 7, characterized in that the air distribution module (13) is bolted onto the base unit (4).

9. (currently amended) The modular air system of ~~any of the claims 3 to~~ claim 7, characterized in that the air distribution module (13) is placed in a remote location relative the base unit (4).

10. (currently amended) The modular air system of ~~any of the claims 2 to~~ claim 9, characterized in that the air treatment module (2) is placed on top of the base unit (4).

11. (currently amended) The modular air system of ~~any of the previous claims~~ claim 10, characterized in that the electronic drier module (3) is placed on one side of the base unit (4).

12. (currently amended) The modular air system of ~~any of the claims 3 to~~ claim 11, characterized in that the air distribution module (13) is placed in communication with the air outlet (5) of the base unit (4).
